

## Some suggestions for What to write on your postcard to your Governor - of NY, NJ, PA or DE -

The Governors of these states are members of the Delaware River Basin Commission which can make the BAN permanent.

please write

I want a permanent BAN of all oil and gas drilling including fracking in the Delaware River Basin (DRB).

**and choose some more as appropriate**

I am a voter in (your state) <--this gets politicians attention!

I live, work, have my family here, have property, have a business here, come to the DRB for recreation, fishing, or other leisure activities.

I want a secure future without the threat of fracking so my children and I will not experience the severe health effects people suffer where fracking is taking place.

I want a secure future without the threat of fracking so my property values are protected.

I regard fracking as a violation of our obligation to be stewards of the land for future generations. **I want my grandchildren to have good drinking water** - and to be able to swim in and eat fish from the Delaware River.

**As Governor you should step up and offer the resolution to the Delaware River Basin Commission (DRBC) that will get us the BAN.** It is the obligation of the DRBC to protect and preserve the resources of the River Basin - the water, land and air!

I am deeply concerned about global climate change and the impact of more fossil fuel use. We need a BAN on all gas and oil drilling in the DRB as well as a halt to allowing the building of more pipelines and gas power plants in the DRB. Gas is a very strong climate change agent. My family deserves a future!

address...include your children's' names - **they can write card too!** ...put their ages

You can write more than one card.
