The Department has investigated the pollution of your water supply spring and has determined that your water supply has been affected by oil and gas well activity. As you are aware, Texas Keystone, Inc. is supplying water, and will continue to do so, until your spring clears or a replacement supply is developed. I am enclosing laboratory sample analysis reports for the two samples I took of your water. The Department will continue to monitor your water.

Should you have any questions, please contact me.

Sincerely,

Douglas J. Neely
Water Quality Specialist
Oil and Gas Management
