Proposed Draft Regulations Addressing Hydraulic Fracturing and Additional Clarifying Amendments

Dangers of Vertical oil gas Wells - the 2010 Reports - part 3 of 3

Continuing the comment begun in Part 1, and continued in part 2, this part has the remaining 4 of the 8 Reports submitted by Damascus Citizens for Sustainability and Delaware RiverKeeper Network attached. They are important information and give reasons to stress that NO gas or oil drilling should be allowed in the Delaware Basin. The proposed prohibition of high volume hydraulic fracturing is good and should be adopted, but additionally all - even low volume and/or vertical wells should also be prohibited.
